

### Easy to use...

It's easy to find your way around the Organiser II. All functions are accessed by selection from the 'menu' which is clearly displayed on the screen when you switch on.

A comprehensive, user-friendly operating manual is supplied giving both the experienced and inexperienced precise information on every aspect of the Organiser's functions.

### It's a complete information library...

CALL BOB  
ON FRIDAY-AM

ITEM: TAXI FARE  
\$12.50, 3/15/87

"What Beethoven compact discs do I own?" "Who was I supposed to call Friday morning?" "What was the selling price of that model?" "When is the car due for an oil change?" "What were my expenses on that trip?" "What hotels do I know in Chicago?"

The way the Organiser II stores and finds data means all your business and personal information is automatically cross-referenced to quickly and easily answer such questions. In short, anything you want to write down and keep, even for brief periods of time, can be stored and recalled instantly.

Over 2000 typical entries are possible, with each capable of being up to 255 characters. Long messages are scrolled across or down the screen as required for viewing. In fact, each entry can contain more information than is present in this paragraph!

There is simply no easier or more efficient way to keep track of information pertaining to your business activities or your personal lifestyle than the Psion Organiser II.

# The Psion Organiser II

## Life Simplified.

# The world's first Lifestyle Compatible Computer

The Psion Organiser II is an incredible, hand-held computer that remembers the who, what, where and when of your hectic schedule. It replaces diaries, appointment books, phone/address books, calendars, calculators, memo pads, note books... just about whatever you use to record important information at home or work.

Use the Organiser II to track your day-to-day activities, maintain business records, compile expenses, note important dates & happenings, catalog a collection, plan a trip itinerary, index airlines, restaurants, hotels around the country, even remind you of things to do.

And, it can be directly connected to any home or office PC, creating a wide range of additional benefits and applications.

Because it's a Lifestyle Compatible Computer, the Psion Organiser II is extremely easy to use, requiring only the slightest hint to recall and display anything you want to know. It was designed to simplify your life, and once you start using it, you'll wonder how you managed without it.

Portable. Practical. The Psion Organiser II.

Life simplified.

**It's a phone, address and note book...**

The Organiser II's incredible memory capabilities let you store all vital personal or professional data—names, addresses, phone numbers, business contacts, birthdays, more. Type in a small detail as a clue (say, ANN for anniversary) and in less than a second the information will be flashed onto the screen.

**It's a diary that reminds you...**

The built-in diary program lets you record all business appointments, social engagements, daily responsibilities, etc. It can be set to turn on and buzz you up to an hour before an appointment, showing you who, where, and when.

**It's an alarm clock and calendar...**

The Organiser II displays date and time from the year to the second. It also has eight alarms that can be set to ring at weekly, daily, or hourly intervals as you wish, for regular weekly appointments or morning calls. And, no resetting is needed when changing batteries.

**It's a clever calculator...**

Your calculations are displayed on the screen as they are entered, so they can be checked—and changed if you want to make several similar calculations. It has 12 digit accuracy, ten memories and full mathematical and scientific functions. And you can set the number of decimal places in the answer anywhere from 0 to 12.

**It's programmable...**

Psion Organiser II is, of course, a computer. It has a built-in extremely powerful, easy to use programming language (OPL), enabling both very simple and highly sophisticated programs to be written to meet your own particular needs. The programs can be stored in the machine or on a plug-in Datapak: OPL's powerful facilities allows up to 4 files from a maximum of 288 to be accessed and processed at the same time. At any time, you can get a status report on the amount of data stored—in the machine and on the Datapaks.

## Datapaks, Programs, and Options...

The Organiser II has two thumb size slots which accept our blank or preprogrammed Datapaks. Datapaks are available in sizes ranging from 16K up to 128K, allowing for unlimited memory expansion and selective storage of your files as you determine.

Preprogrammed Datapaks are available in Finance (calculations from APR & mortgages to tax & investment evaluations), Math (polynomials & quadratics to matrix solutions & integrations), Pocket Spreadsheet (worksheets up to 26 columns by 99 rows), Spelling Checker (displays correct spelling of over 24,000 words), and Travel Pak (foreign conversions and translations). New and different Datapaks are constantly being developed, guaranteeing the Organiser II will always be in step with the times.

On top of the Organiser II is a slot that enables connection via a Comms-Link to desk bound computers. In this way, information may be transferred to and from the Organiser II to a main system. This port also accepts Psion peripheral devices such as our Bar Code Reader and Magnetic Card Reader, making the Organiser II perfect for use in a retail environment.

Other available options include a Mini-Formatter to free up Datapak memory blocks, Home/Office Diary Link for merging information, and a Development System for writing, testing, and debugging programs before transferring them to the Organiser II.
